

For Immediate Release

Abatement Technologies[®], Inc. Announces Participation in the Arab Health 2014 Congress in Dubai, UAE.

Suwanee, GA December 4, 2013

Abatement Technologies is pleased to announce its plans to participate in Arab Health 2014 in Dubai, UAE.

For almost 30 years health care facilities and facility contractors throughout the world have relied on Abatement's state-of-the-art products to provide exceptional performance, quality and value. Abatement Technologies' products include: HEPA-CARE[®] air filtration systems for negative pressure patient isolation; ISOQUAD[®] bed isolation module for patient isolation; HEPA-AIRE[®] and PREDATOR[®] portable air scrubbers for capturing and containing construction dust during facility renovation, and wall mounted and portable pressure differential monitors to monitor for negative or positive pressure in patient isolation rooms and construction areas.

"Arab Health 2014 will be a premier global trade event for the medical industry world wide. Abatement Technologies is honored to exhibit our products for infection control in healthcare as part of the Georgia delegation housed in the U.S.A. Pavilion, the Georgia Department of Economic Development, and Gulf Pioneer Construction of Saudi Arabia" states David J. Willyard, Vice President of Sales. "I am greatly looking forward to attending this event as our company representative."
