

For Immediate Release

### **Abatement Technologies<sup>®</sup>, Inc. Releases New AQUATRAP<sup>®</sup> AT250R LGR Dehumidifier for Restoration Professionals**

Suwanee, GA - September 10, 2012

Abatement Technologies has released its new AQUATRAP AT250R LGR Dehumidifier featuring outstanding structural drying performance and portability in a lightweight, roto-molded cabinet.

The new AT250R weighs just 100 pounds but its exceptional water removal and grain depression ability in a wide range of operating temperatures and economic price make it the best value LGR dehumidifier on the market. Other features include a rugged roto-molded cabinet, user friendly controls, large recessed tires and built-in ergonomic handle for superior maneuverability on the job site.

Cara Agerbeck, national sales manager of Abatement Technologies states "Abatement Technologies is excited to introduce the AT250R to the restoration industry. It outperforms all other units in its class. Of all the small, roto-molded units on the market the AT250R stands out in not only performance but price as well."

About Abatement Technologies, Inc.

Since 1985, thousands of water remediation and disaster restoration contractors have relied on Abatement's state-of-the-art equipment and products to provide exceptional performance, quality and value. Abatement continues to lead the way in the design, manufacture and distribution of high-quality solutions for water damage restoration and mold abatement contractors.
